

# PIPECOUK LTD

---

## 1. Policy Statement

PIPECOUK Ltd is committed to minimising its environmental impact and embedding sustainable practices into every facet of its operations. Even as a modern, largely remote business, we recognise our responsibility to lead by example in reducing emissions, conserving resources, and promoting innovation that benefits both infrastructure and the planet.

We comply with all relevant environmental legislation and seek to exceed expectations wherever commercially viable.

---

## 2. Scope

This policy applies to:

- All PIPECOUK Ltd operations, including remote working, digital systems, manufacturing partnerships, and logistics coordination.
  - All employees, directors, consultants, and contractors.
  - Our relationships with supply chain partners, manufacturers, and customers.
- 

## 3. Our Commitments

PIPECOUK Ltd will:

- **Minimise waste** and ensure responsible disposal of any waste generated through business activities.
  - **Promote energy efficiency**, using low-power technologies and cloud infrastructure over physical servers and paper-based processes.
  - **Select sustainable partners** who demonstrate environmental responsibility in their operations and materials sourcing.
  - **Reduce travel emissions** by operating as a remote-first company and using digital collaboration tools.
  - **Avoid unnecessary packaging** and support the use of recyclable and eco-conscious materials across our pipeline and fittings supply chain.
-

#### **4. Product Lifecycle & Circular Economy**

We encourage:

- Suppliers to provide **long-life, recyclable or reusable products**.
  - Clients to participate in **take-back schemes or refurbishment models**, where applicable.
  - Engineering solutions that support **resource efficiency** and **future-proof infrastructure**, particularly in water, gas, and electric supply lines.
- 

#### **5. Supply Chain and Procurement**

PIPECOUK Ltd actively assesses environmental practices in our supply chain, including:

- Manufacturing emissions and energy sources.
  - Material provenance, including recycled content and conflict-free sourcing.
  - Delivery methods — favouring consolidated shipments and low-carbon logistics where practical.
- 

#### **6. Digital Sustainability**

As an AI-integrated business, PIPECOUK Ltd will:

- Monitor the energy consumption of cloud services and AI models.
  - Minimise unnecessary data storage and processing.
  - Promote digital minimalism in design, development, and customer communications.
- 

#### **7. Continuous Improvement**

Environmental impact is not a fixed concept. PIPECOUK Ltd will:

- Regularly review this policy and its performance outcomes.
  - Set environmental objectives and track progress annually.
  - Adapt quickly to new opportunities, materials, or technologies that improve sustainability.
- 

#### **8. Responsibilities**

## ***Environmental Policy***

10 June 2025

- **Management** will lead by example and integrate environmental values into strategic decisions.
- **Employees** are expected to act responsibly, reduce waste, and report any concerns or improvement ideas.
- **Partners** are required to adhere to the environmental standards defined in our contracts and expectations.

---

## **9. Policy Review**

This policy will be reviewed **annually** or upon major operational changes, legislation updates, or at the discretion of senior leadership.

---

## **10. Sign-Off**

Signed:

**Jamie Larkin**
